Score Plus delivers positive outcomes in 75-80% of rescores

"With the uncertainty of the interest rate market and the importance of maintaining our rate lock, we don't have the time to wait the usual one-to-two months for credit scores to be updated using the normal reporting methods. And now, with interest rates so heavily impacted by credit scores, Score Plus is more important than ever before. The process is simple from start-to-finish and the representatives in the Score Plus department are helpful, friendly, and reliable. It's difficult for me to imagine life without this service."

"A realtor I work with talked to me about a home buyer who kept extending the purchase contract deadline because he could not obtain financing. After speaking with the client, it became apparent to me that correcting just one derogative mark on his credit report would likely enable him to qualify. After using Score Plus, this client's credit score, because of his relatively new credit history, went up almost 100 points. We closed on the purchase a few weeks later. As a result of this accomplishment, another real estate agent began sending me his business, too."
